DAVID SHANK
January 10, 2007

Page 16

1 Q. Could you turn to Exhibit 1 where it has column 4 at
2 the top? And if you could go down to the line numbers
3 are in the middle, down the middle of the page; do you
4 see that?

5 A. Mm-hmm, yes.

6 Q. If you start at line 25, where it says in the
7 preferred embodiment, are you with me there?

8 A. Yes.

9 Q. And it says in the preferred embodiment, a first
10 motor, 24, controls the movement mechanism, 26, for
11 displacement of the lumbar support, 32, upwardly and
12 downwardly through the seat back. A second motor, 28,
13 controls the lumbar support extender, 30, and it
14 governs the degree to which the lumbar support extends
15 outwardly from the seat back towards a spinal
16 curvature in the occupant, period. Both mechanisms,
17 26 and 30, affect the position of the lumbar support,
18 32, of the seat mechanism, 16; do you see that?

19 A. Yes.

20 Q. Was that in any way part of your contribution to the
21 invention alleged in this Exhibit 1?

22 A. My part, no.

23 Q. Do you recall whose part the quoted language I just
24 quoted was contributed by?

25 A. No.
